

# Workload Optimizer

Taking The Load Off Your Shoulders

# Agenda

- ▶ What Is **Workload Optimizer (WLO)**
  - ▶ Who Will Benefit From Using **WLO**
  - ▶ **Workload Optimizer** Added Value
  - ▶ Who Are We?
- 

# What is WLO?

- ▶ **WLO** is a smart analysis tool that complements and enhances CA Detector™ & Subsystem Analyzer™. By analyzing a mainframe sites actual, real-world workload it improve DBA's day-to-day decision making and highlights the crucial issues that should be attended

# Who Will Benefit from using **WLO**?

**Workload Optimizer** will help any DB2 installations who wants to :

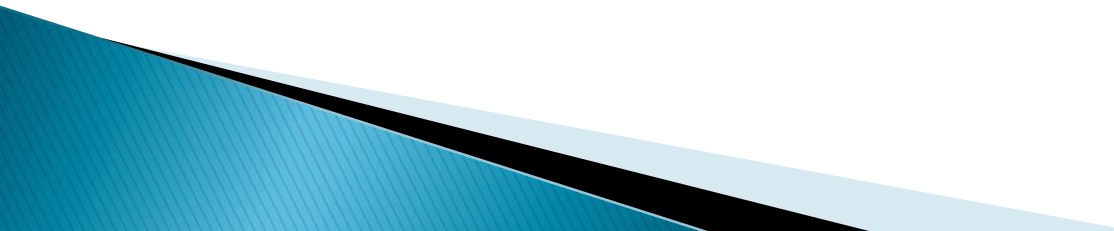

- ▶ Lower DB2 costs
- ▶ keep up with the growing rate of changes in the production environment
- ▶ Improve DBA's productivity and decision making
- ▶ Ease the process of recruiting new employees

# Workload Optimizer Added Value

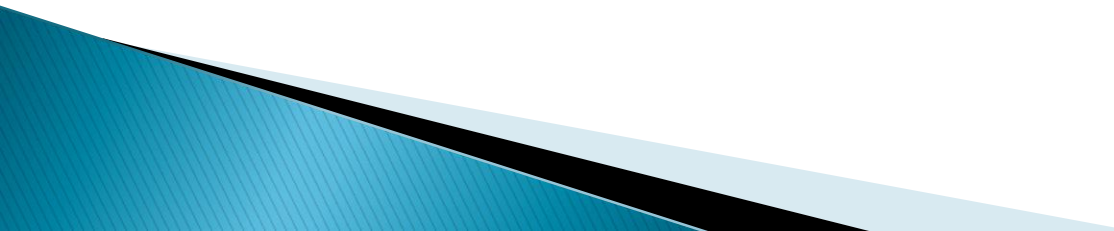

**Workload Optimizer** provide added value to the CA database tools suite:

- ▶ **Competitive Edge:** **WLO** provides customers with abilities that can not be found in competing tools in the market such as:
  - ▶ Cost oriented saving rather than performance oriented saving (saves money, not CPU cycles)
  - ▶ Programs performance comparison
  - ▶ Reports presented in relation to customers daily business routine

# Workload Optimizer Added Value

- ▶ **Save DBAs Time:** **WLO** functionality helps skilled DBA to perform their day-to-day tasks more efficiently and focus them on the site's essential performance issues
  - ▶ **Ease of Use:** reports generated by **WLO** are sent as email attachments, simple to read and easy to forward as tasks to application developers and team leaders
- 

# Workload Optimizer Added Value

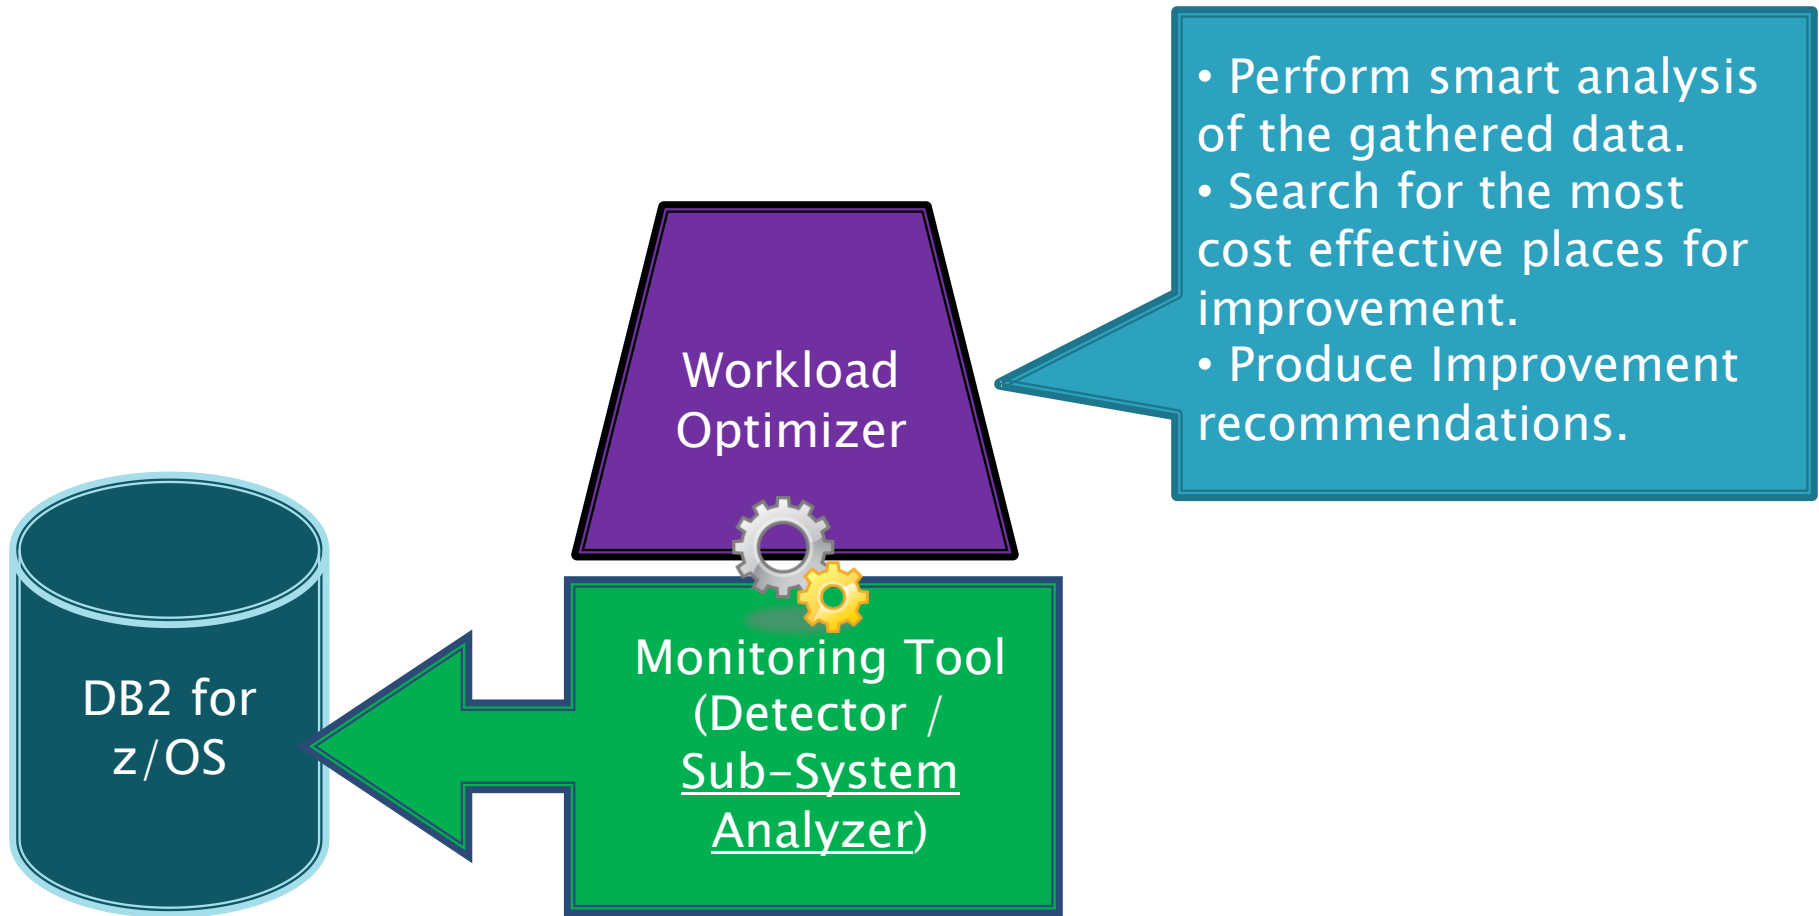

- ▶ **Focus Daily Assignment:** **Workload Optimizer** creates a work methodology that involve CA tools in the technical staff daily routine
  - ▶ **Aging Workforce Solution:** **WLO** shortens the learning curve of new or unskilled employees and helping companies to easily integrate new hires
- 

# Workload Optimizer R.O.I

- ▶ Simplified Data Administrator (DA) work by as much as 40% (based on customer feedback)
  - ▶ Cut DBAs time spent on data gathering and analyzing
  - ▶ Eliminate DBA tuning efforts that will yield little or no actual benefit
  - ▶ Allow to lower MIPS on the sliding windows billed by IBM
- 

# How Does Workload Optimizer Work?

# Who Are We?

- ▶ **Workload Optimizer** is developed by Optare Consulting, an Israel based company providing development, consulting, training and tuning services for the Mainframe platform, specializing in DB2 for z/OS
- ▶ **Workload Optimizer** development is led by Uri Lifshitz (IBM Information Champion) and Assaf Eliyahu (IDUG Speaker and Tuning Specialist)
- ▶ Optare Consulting is an IBM Business Partner and a CA Technologies Technology Business Partner
